

## Jackson Avenue Ramps Project

**Jackson Avenue Ramps Concept** 

**Project Description:** The Jackson Avenue Ramps are included within the TDOT Bridge Inventory and are inspected on a bi-annual basis. The poor rating of the ramps resulted in qualification for participation in the federal bridge replacement program. TDOT is allowing local agencies to administer projects that effect local streets. Therefore, the City will administer all phases of this project including preliminary engineering, right-of-way and construction.

**Engineering Department December 2016 Status:** The projected bid date of this project is July 2017.

Project Designer: Vaughn & Melton Consulting Engineers, Inc.

**City of Knoxville Contact** 

Chief Civil Engineer: Thomas V. Clabo, PE (865) 215-6100

James R. Hagerman, PE Director of Engineering
